EDUCATION	<b>Bachelor of Technology in Computer Science &amp; Engineering</b> Maharaja Agrasen Institute of Technology Guru Gobind Singh Indraprastha University, Delhi, India	2014 – 2018 CPI: <b>79.2%</b>
RECENT EXPERIENCE	<ul style="list-style-type: none"> <li> <b>Indraprastha Institute of Information Technology, Delhi (IIIT-D)</b>  <i>Research Intern</i>            Complex Systems Lab, Center for Computational Biology  <b>Advisor:</b> <a href="#">Dr. Ganesh Bagler</a> </li> </ul>	July, 2018 - Present June 2017 - March 2018
	<ul style="list-style-type: none"> <li> <b>Current Work:</b> My current work focuses on creation of <i>“BitterSweet: A resource to explore and predict taste information in small molecules”</i>. (<a href="http://cosylab.iiitd.edu.in/bittersweet">http://cosylab.iiitd.edu.in/bittersweet</a>)           </li> <li> <b>Previous Work:</b> During my undergraduate studies, we worked on devising new methods to predict phenotypic side effects of drugs using existing data (SIDER4). The work was culminated in the form of a research article and the code was documented &amp; open-sourced on Github (<a href="#">link</a>).           </li> </ul>	
	<ul style="list-style-type: none"> <li> <b>All India Council for Technical Education (AICTE), Govt. of India</b>  <i>Research &amp; Development Intern</i>  <b>Advisor:</b> Dr. N.H. Siddalingaswamy (Director, AICTE)           </li> </ul>	October 2017 - March 2018
	<ul style="list-style-type: none"> <li> <b>Work:</b> Lead a team of 5 and with a project budget of \$4600. We analysed AICTE’s employment statistics dataset and developed dynamic analytic dashboards to aid AICTE in granting approvals to higher education institutions.           </li> </ul>	
PUBLICATIONS	<b>Wadhwa S, Gupta A, Dokania S, Kanji R, Bagler G (2018)</b> A hierarchical anatomical classification schema for prediction of phenotypic side effects. PLOS ONE 13(3): e0193959. <a href="https://doi.org/10.1371/journal.pone.0193959">https://doi.org/10.1371/journal.pone.0193959</a>	
SELECTED PROJECTS	All of my projects (including the following ones) are be available on <a href="https://github.com/sominwadhwa">github.com/sominwadhwa</a>	
	<b>Visual Question Answering through Modal Dialogue:</b> A two semester long B.Tech project based on the application of <i>Malinowski et al.</i> on v2 of theVQA dataset. Idea is to design a CNN + LSTM based model whose outputs are passed through a fully connected followed by softmax layer to improvise the overall accuracy on v2 release of VQA. The entire methodology is documented under a blog- <a href="#">Visual Question Answering through Modal Dialogue</a> <a href="#">Kaggle-Repository*</a> A collection of kernels (written in IPython Notebooks & scripts) designed from datasets obtained from Kaggle for practise as well as competitions. These include implementations of typical Machine Learning algorithms on a range of datasets. <a href="#">TheTwitterPolice</a> Analysis of law enforcement activity on Twitter in India. Collected data from five different police social handles (BeautifulSoup & Selenium), stored them in a database (MongoDB), analysed (sentiment-analysis, time-series etc) & displayed the results graphically in the form of a web-app (flask application deployed on heroku).	
OTHER ACTIVITIES	<ul style="list-style-type: none"> <li> <b>Won Smart India Hackathon</b> (April 2017) I was the Team Lead of a six-member team under the mentorship of <a href="#">Dr. Sambuddha Roy</a> over a period of three months to build a decision support system using Machine Learning to improvise AICTE’s handbook approval system for technical institutions in India for <b>SIH – 7200+</b> teams pan India competed in a 36-hour Hackathon organised by Government of India. As a part of the winning team for AICTE, I’m associated with All India Council for Technical Education (Ministry of Human Resources &amp; Development, Government of India) in a fully funded project (<b>Budget: 2.93L</b>) for taking our prototype forward over the period of 6-8 months beginning October 2017.           </li> <li> <b>Secretary</b>(2015-2016) ‘Association of Computing Machinery (ACM)- Student Chapter’ at M.A.I.T           </li> </ul>	

- **Presentation** Gave an oral talk on, “Study of Random Numbers & their applications in computational physics using Monte-Carlo method” at the 27<sup>th</sup> IUPAP Conference on Computational Physics, **IIT Guwahati** on 2-5 December, 2015.
- **Interned** at a national NGO ‘Umeed - A drop of Hope’ (NGO Reg: S/792/DIST.SOUTH/201) and participated in Project- Knowledge for All (KFA).
- **Rotaractor** (2014-2015) Member of ‘Rotaract Club of Delhi Akash’ where our team jointly organized several large scale events like ‘CanSupport’s Walk of Life (8th Feb 2015) - Fight against cancer.’, ‘Patrika - A paper recycling drive.’
